# Sweepstakes Champion Results

*The following are all 36 players with their rankings for the Sweepstakes Champion.*

*This means each player was ranked using the combined formula:*

Battle Points + Painting (The combined painting from our two judges) + Sportsmanship (Sportsmanship \* 2).

The reason why there are multipliers is because we wanted the break down for Sweepstakes Champion to be 50% Battle, 25% Painting, 25% Sportsmanship. There are 120 possible battle points, which means to obtain the other 50% Sports and Painting must be 60 each, thus the multiplier on sportsmanship.
